

Lab 9 Prelab-Statement

In this lab you will extensively use the file operations provided by the `java.io` package, especially the `BufferedReader`, `BufferedWriter`, `FileInputStream` and `FileOutputStream`.

Make sure you are through with these classes and their basic functionalities (creating an object and using operations read and write) provided by them.

Also make sure to learn and understand the following functions :

- `split()` function of the `String` class
<https://docs.oracle.com/javase/9/docs/api/java/lang/String.html#split-java.lang.String->
- `parseInt()` function of the `Integer` class
<https://docs.oracle.com/javase/9/docs/api/java/lang/Integer.html#parseInt-java.lang.String->
